Your learning experience with ADL will not only depend on the quality of the course, but also the quality of the person teaching it. This course is taught by Aleksandr Klyashitsky and Juliette Harris. Your course fee includes unlimited tutorial support throughout from one of these excellent professionals. Here are their credentials:

Aleksandr Klyashitsky  
*BSc Engineering Physics (Honours, University of Alberta, Canada)*

Aleksandr focused on lasers, optics and software research during and after his degree. He went on to work in a Canadian laser gas detection company where he published some of his research and focused on optimizing the optics and software of the next generation product. After working in this field for a few years, Aleksandr started tutoring engineering, physics, chemistry and maths to students in and just before University, with which he now has a few years experience. Aleksandr is very interested in sustainable technologies which has shifted his focus to researching and learning modern and traditional farming and natural building methods around Europe.
Juliette Harris  
*BSc Hons Biology (University of Sussex)*

Juliette has over 10 years experience in teaching and private tutoring. As an undergraduate, she contributed to published research on the behaviour of an endangered bat species, though her main areas of interest and specialisation are genetics and cellular biology. After 7 months in the rainforests & reefs of Central America, Juliette began her teaching career at prestigious private school, Brighton College. She soon returned to Central America, heading up a field-trip for A-level students. She has been private tutor & exam coach to a range of students with very diverse backgrounds, aptitudes and expectations. More recently, Juliette has enjoyed working with adults with learning difficulties and enormous barriers to education. Juliette currently splits her time between England and Bulgaria, where she works as a teacher and missionary.
